## EDUCATION: WORLD'S FIRST CINDYNICS COURSE

*Cindynics Diploma, Science of Risk-Neutralization™ Qualification – First level*

What has radically changes is the concept of Risk, an approach that will no longer be extremely specialized or vertical (and therefore siloed), but organized and characterized by a close connection of the contexts in which Risk manifests itself, to allow strategic rather than tactical management in its entirety by companies, entities and people.

KELONY® has devised a new strategy that goes beyond the classic risk management and probability calculation starting from Cindynics - the Science of Risk - by developing a new VeVa™ Protocol and highly innovative algorithms dedicated to Risk Neutralisation™, able to adapt to all possible realities in a fast and scalable way.

Professionals and managers in charge of value creation processes in companies, as well as board members, need to be aware of the new interrelated risks and Apex™ risks capable of causing deleterious, sometimes irrecoverable effects that KELONY® with the Protocol of its creation can identify.

The Course provides participants with the theoretical and practical fundamentals on how to implement the best risk defense strategies.
